FOCUS ON FASHION

Pantone Colors for 2019

Did You Know?

■ Wearing an engagement ring on the third finger of the left hand dates back to the ancient Egyptians, who believed that the 'vein of love' linked the heart and the ring finger.

■ Many believe that the famous Hope diamond caused the Titanic to sink; the truth is, the Hope diamond was not aboard the Titanic.

■ Ancient Greeks believed that diamonds were the tears of the gods or splinters that had broken off of falling stars, and that Cupid's arrows were tipped with diamonds.

April Birthstone

Diamond. This pure white gem is synonymous with love and innocence. Since ancient times, diamonds have symbolized invincibility for those born in April because of their hardness and durability.

Late last fall, Pantone released its fashion color trends for Spring/Summer 2019. The report states 12 colorful shades and four neutral tones that will provide a prominent future featuring bold, empowering and jubilant colors to uplift one's spirit and confidence. According to Pantone, "The joyful hues lend themselves to playful expression and will take us down a path of creative and unexpected combinations."

While 2018 was the year of pastels, 2019 looks to be roaring down runways with bolder, heavily saturated and exuberant, fun colors. This season keep your eyes open for Pantone colors including Jester Red, Turmeric, Living Coral, Pink Peacock, Princess Blue, Toffee, Terrarium Moss, and the list goes on. What will be your favorite?
