Did You Know?

While all gemstones are mined in the earth's crust, only diamond and peridot are formed in the earth's mantle, the deeper layer that contains molten rock called magma. Diamonds form approximately 100 miles (160km) deep, while peridot forms 20-55 miles (32-88km) deep in the upper mantle.

December Birthstones
Turquoise and Zircon are both prized since Biblical times for their beauty and promise of prosperity. **Tanzanite**, a glittering purple-blue gem named in honor of Tanzania, where it was discovered in 1967, is today one of the world's most popular gems.

'T is the season for snow, sugarplums, and shopping! December is a magical time of year. From festivities to family gatherings, the upcoming holidays are a much-anticipated time for many. On the other hand, shopping stress is real, especially if you've waited until the last minute. But don't worry, we can help you pick out the perfect gifts that fit your style and budget. From classic pearl necklaces, trendy hoops and bracelets, beautiful diamond jewelry, and everything in between, we have you covered this holiday season.

Shopping small businesses (like ours) during the holidays assures personalized attention and quality gifts, all while supporting your local community. We appreciate your patronage! Happy holidays!
