 BRILLIANCE YOU DESERVE®

**D**rusy is a term that refers to a quartz matrix covered with a thin layer of tiny, tightly-packed crystals that produce

a rough blanket of gem material. These crystals resemble sugar granules and can range in fineness from coarse to powdery. The word drusy comes

from the ancient Greek word "drossos" which means dew.

Drusy color comes from the color of the base material which can be orange, yellow, white, gray, or brown. Sometimes the base material is banded or spotted with color, making it even more interesting.

Drusy jewelry is available in fashionable, contemporary sterling silver designs for both men and women set in bracelets, station necklaces, rings, pendants, and cuff links. It is perfect for those who want jewelry to be a statement of taste and an expression of individuality.
